/Source/Tools/ExternalIncludes.h

```
graph TD; A["/Users/wilfeli/Dropbox<br>/ABM/SolarPanels/ABMIRISLab<br>/Source/Tools/ExternalIncludes.h"] --> B[cstdint]; A --> C[string]; A --> D[memory]; A --> E[unordered_set]; A --> F[map]; A --> G[vector]; A --> H[deque];
```

The diagram illustrates a directory structure where a header file, `ExternalIncludes.h`, is located in the path `/Users/wilfeli/Dropbox/ABM/SolarPanels/ABMIRISLab/Source/Tools/`. This header file includes several standard C++ headers, as indicated by the arrows pointing from it to the following list of headers: `cstdint`, `string`, `memory`, `unordered_set`, `map`, `vector`, and `deque`.

`cstdint`

`string`

`memory`

`unordered_set`

`map`

`vector`

`deque`
